

More than Microscopy Software.

Enhanced Fluorescence Microscopy Imaging

 **INSCOPER**

Inscoper is the new **universal** and **full-featured acquisition software** for camera-based microscopes.

Thanks to its specialized electronics, Inscoper renews the way the microscope is used, both in terms of **technical performance** and **system integration**, as well as **ease-of-use**.

A new approach that allows inspiring insights for microscopy imaging

INSOPER

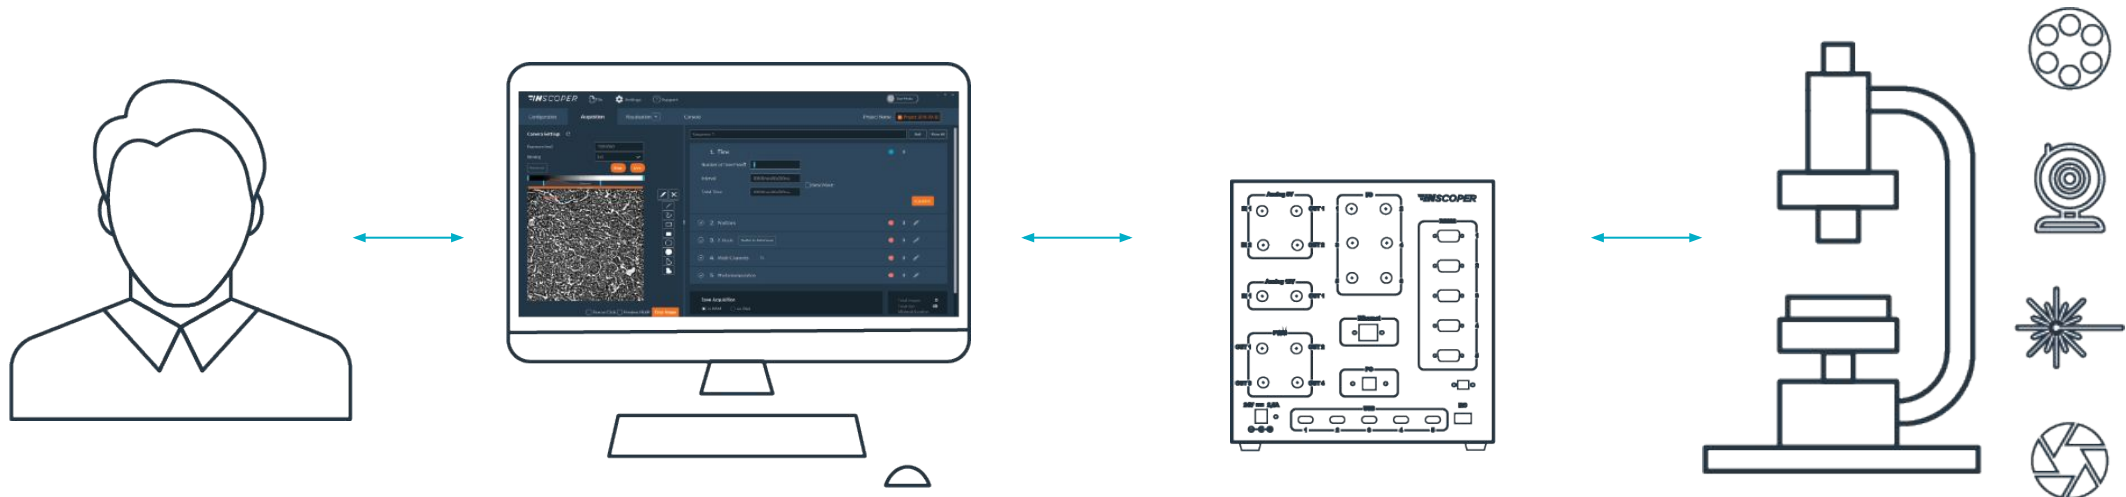

✓ All third-party devices controlled

✓ Temporal resolution x3

✓ A single window to do everything

✓ All acquisitions triggered and synchronized

✓ Manipulations combined and personalized

Example 1: Video-microscope / 5D imaging

INSOPER

Example 2: Spinning disk confocal / FRAP + 5D imaging

INSOPER

Example 3: home-made LS/SPIM + 5D imaging

Example 4: TIRF/Photomanipulation + 5D imaging

INSSCOPER

Example 5: ratiometric imaging

INSOPER

The logo features a stylized blue icon on the left, composed of two horizontal bars of different lengths, resembling a double 'F' or a microscope component. To the right of this icon, the word 'INSCOOPER' is written in a dark blue, bold, sans-serif typeface.
